

THESE TRUCKS HAVE A WAY OF PUTTING DRIVERS, OWNERS AND MAINTAINERS IN A HAPPY PLACE.

International® 4000 Series trucks boldly challenge the age-old notion that you can't please everybody. With maximum uptime, unmatched durability and reliability, outstanding ride and comfort and easy serviceability, these trucks have universal appeal.

Driver delights:

- Easy-to-grasp door handles, wide door openings and well-placed offset steps with three-point entry allow for easy entry and egress.
- The tight turning radius provides outstanding maneuverability.
- The ride-engineered chassis increases driver productivity with outstanding ride, handling and control.
- The sloped hood and the swept-back angle and curved design of the windshield offer a commanding view of the road.

- The frame system provides increased payload capacity and eliminates the need for "L" reinforcements.
- The industry's best chassis and engine ensure low cost of operation and high resale value.

Maintainer advantages:

- Repair times have been reduced up to 20% with extended preventive maintenance service intervals, easy access to major components and faster daily fluid checks.
- The International® Diamond Logic™ Electrical System features fewer wires and connections while simplifying troubleshooting and reducing diagnostic time.
- Hood, grille, mirror and headlights are easy to repair or replace.

- With a high-output HVAC system and more shoulder room, headroom and belly room, drivers of all sizes are comfortable in all kinds of weather.

Owner appeal:

- Legendary International® engines deliver superior reliability and durability, higher uptime, extended life, reduced cost of ownership, and more horsepower and torque.

International® DT 466

INTERNATIONAL[®] 4000 Series

- ▲ The front windshield features over 2,000 sq in (12,903 sq cm) of glass for excellent visibility.
- ▲ The one-piece design, thicker outer glass and swept-back angle increases safety and noise control – while helping to deflect road debris.

- ▲ Two-way breakaway mirror design can withstand an impact up to 9-mph, which eliminates door damage and reduces repair and replacement costs. (Shown with optional chrome finish.)

- ▲ The spacious cab offers more shoulder, head and belly room, while the best-in-class HVAC system provides optimum temperature and airflow control. The result: a comfortable driver environment. Optional air-conditioning comes with an automatic failure protection system for reduced repair costs.

- ▲ Three-step prime/base/clear coat paint process for the hood and cab provides outstanding resistance to corrosion and fading, lowers maintenance costs and increases resale value.

- ▲ A clean frame rail CA (cab to axle) simplifies body and equipment mounting.

- ▲ Interior door handles, wide door openings, three-point entry system and non-slip treaded steps provide easy entry and egress.

- ▲ A set-back axle provides outstanding maneuverability and a tight turning radius, making it easier to negotiate through cramped spaces, which increases driver efficiency and productivity.

- ▲ Standard composite construction headlights with halogen bulbs are longer-lasting and easy to replace for increased uptime.

- ▲ Powder-coated components resist rust, chips and scratches for added durability and long-lasting good looks. (Shown with optional chrome bumper.)

Benefits that serve owners, drivers and maintainers.

- ▲ OWNER
- ▲ DRIVER
- ▲ MAINTAINER

▲ The integrated powertrain features engine and transmission combinations that are specifically engineered for your application – adapting to load and driving conditions for unmatched responsiveness and performance.

▲ Three-piece hood allows for independent fender replacement, reducing labor and parts costs.

▲ The standard chrome grille features simple four-bolt mounting, reducing repair time and replacement costs.

▲ The International® Diamond Logic™ Electrical System brings added brainpower to your operation – resulting in increased vehicle reliability, simplified diagnostics, easy body integration and maximum uptime. The fully programmable system allows for automation of tasks; for example, lights can be programmed to come on with wipers.

▲ Standard rear-suspension rubber auxiliary springs provide better stability and a smoother ride, while the optional frame-mounted exhaust isolates the cab from noise and vibration – further increasing driver comfort and satisfaction.

▲ The optional International® Ride-Optimized Suspension provides excellent ride, handling and stability, and protects cargo by minimizing shock and vibration.

▲ A lighter, more durable single frame-rail system delivers increased payload capacity and yield strength without the need for inverted “L” reinforcements, which reduces overall vehicle weight and extends vehicle life.
